

Agnes RF Microneedling — Service Knowledge Document

What It Is

Agnes RF is a precision radiofrequency microneedling treatment specifically designed to target stubborn fat deposits and provide focused tightening in delicate areas like around the eyes and lower face. Unlike traditional RF microneedling that treats broader areas, Agnes delivers targeted energy to very specific problem zones for dramatic, localized results.

How it works:

- Ultra-fine insulated microneedles deliver RF energy to precise depths
- Targets fat cells and stimulates collagen in specific areas
- Permanently reduces fat pockets through controlled heating
- Tightens skin with minimal surface damage
- Precision treatment for areas other technologies can't safely address

What it treats:

- Under-eye bags and puffiness
- Jowls and lower face sagging
- Double chin (submental fat)
- Smile lines (nasolabial folds)
- Marionette lines
- Neck laxity
- Stubborn fat deposits in facial areas

Key benefits:

- Treats delicate areas safely (especially eyes)
- Permanent fat reduction in treated areas
- Precision targeting impossible with other treatments
- Minimal downtime for dramatic results
- Safe for all skin types
- Long-lasting tightening effects
- Non-surgical alternative to blepharoplasty or lower face lift

Treatment Areas & Pricing

Eyes (Upper & Lower) — \$1200

- Under-eye bags and puffiness
- Upper eyelid hooding (mild)
- Crow's feet and periorbital wrinkles
- Best for: Eye rejuvenation, bags, non-surgical blepharoplasty alternative

Lower Face/Jowls — \$1000

- Jowl area and jawline definition
- Marionette lines
- Early facial sagging
- Best for: Jawline contouring, jowl reduction, lower face tightening

Additional areas available:

- Smile lines (nasolabial folds)
- Double chin
- Neck bands
- Custom treatment plans available during consultation

Who It's For

Ideal candidates:

- Adults with under-eye bags or puffiness
- People with early jowling or lower face sagging
- Anyone wanting eye rejuvenation without surgery
- Those with stubborn facial fat pockets
- People seeking precision facial contouring
- Clients not ready for surgical options

Perfect for treating:

- Genetic under-eye bags
- Fat pockets around eyes
- Jowls and jawline blurring
- Submental fat (double chin)
- Early facial sagging
- Specific problem areas resistant to other treatments

Great if you:

- Have been told you need surgery for eye bags
- Want jawline definition without filler

- Have tried everything else for under-eye bags
- Prefer targeted treatment over full-face procedures
- Are committed to following aftercare

Who Should NOT Get It

Avoid Agnes RF if you have:

- Active eye infections or styes
- Metal implants in treatment area
- Pacemaker or defibrillator
- History of keloid scarring
- Severe dry eye syndrome (for eye treatments)
- Recent eye surgery (wait 6 months)
- Uncontrolled diabetes

Postpone treatment if you:

- Are pregnant or breastfeeding
- Have active skin infections
- Recently had Botox or filler in treatment area (wait 2-4 weeks)
- Are taking Accutane (wait 6-12 months)
- Have active cold sores or herpes outbreak
- Recently had other facial procedures

Medical considerations:

- Thyroid eye disease (requires clearance)
- Glaucoma or serious eye conditions (requires clearance)
- Blood clotting disorders (discuss with provider)

Always discuss full medical history during your free consultation.

Typical Session Length

60-90 minutes total

Breakdown:

- Consultation and marking: 10-15 minutes (first visit)
- Numbing cream application: 30-45 minutes
- Treatment: 20-30 minutes (varies by area)
- Post-treatment care: 10 minutes

What to expect during treatment:

- Strong numbing makes it tolerable
- More intense sensation than regular microneedling
- Heat and pressure in treated areas
- Some areas more sensitive (under eyes can be intense)
- Single treatment typically sufficient for each area

Typical Downtime

3-7 days of visible recovery (varies by area)

Day 0 (Immediately after):

- Significant swelling (especially eyes)
- Redness and warmth
- Small marks where needles entered
- Possible minor bruising

Days 1-3:

- **For eyes:** Moderate to severe swelling (worst day 2)
- **For lower face/jowls:** Moderate swelling
- Redness decreasing
- Possible bruising developing
- Skin feels tight

Days 4-7:

- Swelling significantly reduced
- Minor residual puffiness
- Bruising fading (if present)
- Can typically return to social activities
- Makeup helps cover any remaining marks

Days 7-14:

- Most visible signs resolved
- Full social activities resume
- Results start becoming visible

Return to work: 3-5 days (can be longer for eye treatments) **Return to exercise:** 5-7 days

Return to full social calendar: 7-10 days

Results timeline:

- **Weeks 2-4:** Swelling fully resolves, initial results visible

- **Months 1-3:** Progressive tightening and fat reduction
- **Months 3-6:** Peak results as collagen remodels
- **Duration:** 2-3+ years, results often permanent for fat reduction

What Results People Often Notice

Within 4-6 weeks:

- Reduced under-eye bags or puffiness
- Better-defined jawline
- Tighter skin in treated areas
- Reduced fat in targeted zones
- Smoother contours

At 3-6 months (peak results):

- Dramatic reduction in eye bags (for eye treatments)
- Significantly improved jawline definition
- Tighter, more youthful appearance
- Permanent fat reduction in treated areas
- Natural-looking rejuvenation

Long-term:

- Results typically last 2-3+ years
- Fat reduction is often permanent
- Continued collagen production
- Natural aging continues but from improved baseline

What it does NOT do:

- Remove excess skin (if severe, may still need surgery)
- Treat very deep wrinkles
- Provide instant results (patience required!)
- Stop the natural aging process

Aftercare Basics

First 24-48 hours (CRITICAL):

- **For eye treatments:**
 - Sleep elevated (2-3 pillows) to minimize swelling
 - Apply ice packs (10 min on, 10 min off) for first 48 hours
 - Avoid bending over or heavy lifting

- No contact lenses for 24-48 hours
- **For all treatments:**
 - Keep area clean and dry
 - No makeup for 24 hours
 - No touching or rubbing treated areas
 - Take arnica supplements to reduce bruising
 - Avoid blood thinners if medically safe (aspirin, ibuprofen)

Days 2-7:

- Gentle cleansing only
- Light makeup OK after 48 hours
- Continue sleeping elevated
- No strenuous exercise
- Avoid heat (saunas, hot yoga, direct sun)
- No swimming

First 2 weeks:

- Wear SPF 30+ when outside
- Avoid other facial treatments
- No Botox or filler yet
- Gentle skincare only
- No harsh active ingredients

First month:

- Continue sun protection
- Gradually resume normal skincare
- Stay well-hydrated
- Maintain healthy lifestyle

To maximize results:

- Follow ALL aftercare instructions precisely
- Attend follow-up appointments
- Protect from sun damage
- Avoid touching/massaging treated areas
- Be patient (results take 3-6 months)

When to call us immediately:

- Severe or worsening pain
- Signs of infection
- Vision changes (for eye treatments)
- Excessive swelling beyond day 3

- Any concerning symptoms

Pricing Structure

Agnes RF Microneedling:

- **Eyes (Upper & Lower):** \$1200
- **Lower Face/Jowls:** \$1000

Recommended treatment plan:

- **Typically 1 treatment per area** provides significant results
- Some may benefit from 2 treatments spaced 3-6 months apart
- Results are long-lasting (2-3+ years)

Value proposition:

- Compare to:
 - Surgical blepharoplasty: \$3,000-\$8,000 + risks and longer downtime
 - Lower facelift: \$5,000-\$15,000 + surgery risks
 - Temporary fillers for jawline: \$1,400+ every 12-18 months

Free consultation available to assess candidacy and create treatment plan

FAQs

What's the difference between Agnes RF and Scarlet RF?

- **Agnes RF:** Precision treatment targeting specific fat deposits and small areas (eyes, jowls). Single, focused treatments.
- **Scarlet RF:** Broad skin rejuvenation, tightening, and texture improvement across larger areas (full face, neck, chest).

Think: Agnes for targeted problem zones, Scarlet for overall rejuvenation. Some clients do both!

Does it really work for under-eye bags? Yes! Agnes RF is one of the only non-surgical treatments that actually reduces under-eye bags caused by fat herniation. It's often called "non-surgical blepharoplasty." Results can be dramatic for the right candidates.

Is it painful? With adequate numbing, most clients tolerate it well. The eye area can be more intense (especially immediately around eyes), but the treatment is quick. Most say temporary discomfort is worth the results.

How much swelling should I expect? For eye treatments: Expect significant swelling for 3-5 days, especially day 2. Plan accordingly! For lower face/jowls: Moderate swelling for 3-4 days. Think of it like recovering from minor dental work.

Can I just do the lower eyes (bags only)? Yes! Treatment is customized to your specific concerns. We can treat just lower eyes, just upper eyes, or both—whatever addresses your goals.

Will I need repeat treatments? Most people achieve desired results with 1 treatment. Some may choose a second session 3-6 months later for additional improvement. Results typically last 2-3+ years.

How is this different from under-eye filler? Under-eye filler fills in hollows but doesn't reduce bags. In fact, filler can sometimes worsen puffiness. Agnes actually reduces the fat causing bags. They address different concerns and sometimes complement each other.

Can this replace a facelift? For mild to moderate concerns, yes! For severe sagging or excess skin, surgery may still be necessary. Agnes is perfect for early intervention or those not ready for surgery.

What if I already have filler in the treatment area? That's fine, but we need to wait 2-4 weeks after your last filler treatment before doing Agnes. Existing filler won't interfere with results.

Is it safe for my eyes? Yes, when performed by trained professionals. The needles are insulated so energy is delivered only at the tip, protecting surrounding tissue. We use protective shields and precise technique.

How long until I can wear makeup? Wait 24-48 hours, then light makeup is fine. Use clean brushes and gentle application over treated areas.

Next Steps

Ready to address stubborn problem areas?

1. **Book your FREE consultation:** Online at harmonyaestheticsandwellness.glossgenius.com or call/text (240) 280-0020
2. **During your consultation:**
 - We'll assess your specific concerns
 - Determine if Agnes RF is the right solution
 - Show you before/after photos
 - Create customized treatment plan
 - Discuss realistic expectations
 - Provide exact pricing

3. **Choose your treatment area:**

- Eyes (\$1200) — Under-eye bags, puffiness, upper lid concerns
- Lower Face/Jowls (\$1000) — Jawline definition, jowl reduction

4. **Plan for recovery:** Schedule when you can have 5-7 days of downtime

5. **Bring photos** of results you like (optional but helpful)

Questions? Text us at (240) 280-0020 or use the contact form on our website.

Perfect for: Under-eye bags, jowls, precision facial contouring, non-surgical alternatives to blepharoplasty or facelifts
