

Dermal Fillers (Juvederm & RHA) — Service Knowledge Document

What It Is

Dermal fillers are injectable gel-based products made from hyaluronic acid (HA) that restore volume, smooth lines, and enhance facial contours. Unlike neurotoxins (Botox) that relax muscles, fillers physically fill in wrinkles and add volume where needed.

How they work:

- Hyaluronic acid attracts and holds moisture (up to 1000x its weight in water)
- Adds instant volume to treated areas
- Stimulates natural collagen production over time
- Results are immediate and improve over 2 weeks

What fillers can do:

- Fill in deep lines and wrinkles
- Restore lost facial volume
- Enhance lips, cheeks, and jawline
- Improve under-eye hollows (tear troughs)
- Create more defined facial contours

Product Differences

Juvederm Family — Starting at \$800

- Most widely used filler brand globally
- Smooth, cohesive gel consistency
- Various formulations for different areas:
 - Juvederm Voluma: Cheeks and mid-face volume
 - Juvederm Vollure: Moderate to severe facial wrinkles
 - Juvederm Volbella: Lips and fine lines around mouth
 - Juvederm Ultra: Versatile for lips and facial lines

RHA (Resilient Hyaluronic Acid) — Starting at \$700

- Newer technology designed to mimic natural HA in skin
- More flexible and adapts to facial movement

- Ideal for dynamic areas (around mouth, smile lines)
- Three densities: RHA 2, RHA 3, RHA 4 (increasing volume/depth)

Which is right for you? Our provider will recommend the best product based on the treatment area, your skin thickness, desired results, and facial anatomy during your free consultation.

Who It's For

Ideal candidates:

- Adults seeking to restore youthful volume
- People with moderate to severe facial wrinkles
- Those wanting fuller lips or enhanced facial features
- Patients seeking immediate, natural-looking results
- Anyone looking for non-surgical facial rejuvenation

Common treatment areas:

- **Lips:** Add volume, define borders, improve symmetry
- **Cheeks:** Restore volume, lift mid-face
- **Nasolabial folds:** Smooth smile lines from nose to mouth
- **Marionette lines:** Fill lines from mouth to chin
- **Under eyes:** Reduce hollow, dark appearance (tear troughs)
- **Jawline:** Define and contour
- **Chin:** Add projection and balance
- **Temples:** Restore volume loss
- **Hands:** Rejuvenate appearance

Who Should NOT Get It

Avoid if you:

- Are pregnant or breastfeeding
- Have active skin infection or inflammation at injection site
- Are allergic to hyaluronic acid or lidocaine
- Have bleeding disorders (discuss with provider)
- Have history of severe allergic reactions (anaphylaxis)
- Have unrealistic expectations

Conditions requiring extra caution:

- Autoimmune disorders
- Taking blood thinners (increases bruising risk)
- History of cold sores (may trigger outbreak near lips)

- Recent dental work (wait 2 weeks before lip filler)

Always disclose your full medical history during your free consultation.

Typical Session Length

30-60 minutes total

- Consultation/marketing: 10-15 minutes (first visit)
- Numbing cream application: 10-15 minutes (optional but recommended)
- Preparation and photography: 5 minutes
- Injections: 15-30 minutes (varies by number of areas)
- Post-treatment assessment: 5 minutes

Most patients can schedule during extended lunch break or after work.

Typical Downtime

Minimal but more than neurotoxins

Immediately after:

- Swelling at injection sites (normal and expected)
- Redness and tenderness
- Small bumps or lumps (resolve in hours to days)
- Possible pinpoint bleeding or bruising

First 24-48 hours:

- Moderate swelling, especially for lip fillers (most swelling subsides in 48 hours)
- Bruising possible (varies by individual and area)
- Slight asymmetry as product settles

First week:

- Residual swelling decreases gradually
- Bruising fades (easily covered with makeup after 24 hours)
- Results continue to refine as product integrates

Return to normal activities: Immediately, but avoid strenuous exercise for 24 hours **Return to exercise:** Wait 24-48 hours **Social events:** Plan treatments 1-2 weeks before important events to allow swelling to fully resolve

Results timeline:

- Immediate visible volume
- Final results: 2 weeks after swelling resolves
- Duration: 6-18 months depending on product, area, and metabolism

What Results People Often Notice

Immediately:

- Visible volume in treated areas
- Smoother appearance of lines and wrinkles
- Fuller, more defined lips (if treated)
- Lifted, more youthful facial contours

Within 2 weeks (after swelling resolves):

- Natural-looking enhancement
- Improved facial balance and symmetry
- Hydrated, plump skin appearance
- Restored youthful facial proportions
- Enhanced features that complement your natural beauty

Long-term benefits:

- Gradual collagen stimulation
- Maintained results with touch-ups
- Reversible with hyaluronidase if desired

What it does NOT do:

- Stop the aging process permanently
- Tighten loose skin (consider RF microneedling or other treatments)
- Replace need for good skincare

Aftercare Basics

First 24 hours:

- Apply ice packs (10 minutes on, 10 minutes off) to reduce swelling
- Sleep elevated (2 pillows) to minimize swelling
- Avoid touching, pressing, or massaging treated areas
- No strenuous exercise, heavy lifting, or bending over
- No alcohol (increases bruising and swelling)
- Avoid excessive heat (sauna, hot yoga, direct sun)

First few days:

- No dental work for 2 weeks (if lips were treated)
- Avoid facials, laser treatments, or chemical peels for 2 weeks
- Sleep on your back if possible
- Use gentle skincare products
- Avoid blood-thinning medications if medically safe (aspirin, ibuprofen)

For lip fillers specifically:

- Avoid puckering, kissing, or using straws for 24-48 hours
- No lipstick for 24 hours
- Stay well-hydrated

To maximize results:

- Follow all provider instructions carefully
- Attend any scheduled follow-up appointments
- Take arnica supplements (before and after) to reduce bruising
- Use recommended skincare products

When to call us:

- Severe pain or discomfort
- Signs of infection (warmth, excessive redness, pus)
- Skin color changes (blanching/whiteness)
- Vision changes
- Persistent lumps beyond 2 weeks

Pricing Structure

Juvederm Fillers: Starting at \$800 per syringe **RHA Fillers:** Starting at \$700 per syringe

Typical syringes needed by area:

- **Lips:** 1 syringe (subtle) to 2 syringes (fuller)
- **Nasolabial folds:** 1-2 syringes
- **Marionette lines:** 1 syringe per side
- **Cheeks:** 1-2 syringes per side
- **Under eyes:** 1 syringe total (sometimes split between appointments)
- **Jawline:** 2-4 syringes total
- **Full face rejuvenation:** 4-8 syringes

Example treatment costs:

- Lip enhancement (1 syringe RHA): \$700
- Nasolabial folds (2 syringes Juvederm): \$1,600

- Cheek volumization (2 syringes Juvederm Voluma): \$1,600
- Full face rejuvenation (6 syringes): \$4,200-\$4,800

Exact pricing and syringe needs determined during your free consultation based on your anatomy, goals, and treatment plan.

Package deals available: Multi-syringe discounts often offered. Ask about membership pricing.

FAQs

What's the difference between fillers and Botox? Botox relaxes muscles to smooth dynamic wrinkles (caused by movement). Fillers add volume to fill static wrinkles and enhance features. Many people use both for complete facial rejuvenation—Botox for the upper face (forehead, eyes) and fillers for mid-to-lower face volume.

How long do fillers last?

- Lips: 6-12 months
- Nasolabial folds/marionette lines: 9-12 months
- Cheeks: 12-18 months
- Under eyes: 12-18 months Duration varies based on product, area, metabolism, and lifestyle factors.

Do fillers hurt? Most fillers contain lidocaine (numbing agent) built in. We can also apply topical numbing cream beforehand. Discomfort is typically mild—described as pressure or slight pinching.

Will I look overdone or unnatural? Not when done by skilled injectors! Our goal is natural enhancement that looks like "you, but refreshed." We take a conservative approach and can always add more at follow-up if desired.

What if I don't like the results? Hyaluronic acid fillers can be dissolved with hyaluronidase enzyme if needed. This is rare but provides peace of mind.

Can I get fillers while breastfeeding? We recommend waiting until you're done breastfeeding. Please discuss your specific situation during your free consultation.

When can I wear makeup after fillers? Wait 24 hours before applying makeup to injection sites to reduce infection risk.

Will people know I got filler? When done well, people will notice you look refreshed and rested—but won't necessarily know you had a treatment. Results should look natural and suit your facial structure.

How often do I need touch-ups? Most clients return every 9-18 months depending on the area and product. Some areas (like lips) metabolize faster and may need more frequent touch-ups.

What's the best filler for lips? We typically use Juvederm Volbella or RHA 2/3 for lips because they're soft, smooth, and designed for areas with lots of movement.

Next Steps

Ready to restore volume and enhance your natural beauty?

1. **Book your FREE consultation:** Online at harmonyaestheticsandwellness.glossgenius.com or call/text (240) 280-0020
2. **During your consultation:**
 - We'll assess your facial anatomy and volume loss
 - Create a customized treatment plan
 - Recommend the best filler products for your goals
 - Provide exact cost estimates
 - Show before/after photos
 - Answer all your questions
3. **Same-day treatment often available** if you're ready!
4. **Bring photos** of results you like (optional but helpful)

Questions? Text us at (240) 280-0020 or use the contact form on our website.
