

De|Rive Hair Restoration (PRP)

Service Knowledge Document

SECTION: Overview

De|Rive Hair Restoration uses Aquafirme technology combined with Platelet-Rich Plasma (PRP) therapy to deliver concentrated growth factors directly into the scalp. This non-invasive treatment stimulates hair follicles, promotes natural hair growth, and improves hair thickness and density using the body's own healing mechanisms.

SECTION: How It Works

- Blood sample is drawn and processed to concentrate platelets
 - PRP contains growth factors that stimulate hair follicles
 - Aquafirme technology delivers PRP deep into scalp tissue
 - Activates dormant follicles and strengthens existing hair
 - Improves scalp health and blood circulation
 - Natural, biological approach using the patient's own cells
-

SECTION: Conditions Treated

- Thinning hair and hair loss
- Androgenic alopecia (male and female pattern baldness)
- Receding hairline

- Widening part
 - Overall hair density loss
 - Weak or brittle hair
 - Poor scalp health
-

SECTION: Key Benefits

- Non-surgical and minimally invasive
 - Uses the patient's own blood (no foreign substances)
 - Minimal downtime
 - Safe and well-tolerated
 - Stimulates natural hair growth
 - Improves existing hair quality
 - Suitable for both men and women
 - Can be combined with other hair loss treatments
-

SECTION: Pricing and Treatment Plan

Cost

- De|Rive Hair Restoration: \$400 per session

Recommended Protocol

- Initial series: 3–6 treatments

- Session spacing: Every 4–6 weeks
- Maintenance: Every 6–12 months
- Visible results: Typically after 3–6 treatments (3–6 months)

Treatment Rationale

Hair growth follows natural cycles. Repeated treatments provide cumulative stimulation and progressive follicle activation.

SECTION: Ideal Candidates

Suitable Patients

- Adults with thinning hair or hair loss
 - Early to moderate male pattern baldness
 - Female pattern hair loss
 - Diffuse thinning or density loss
 - Patients seeking natural, non-surgical solutions
 - Individuals committed to a treatment series
-

SECTION: Contraindications and Exclusions

Do Not Treat If:

- Active scalp infections or skin conditions
- Blood disorders or clotting abnormalities
- Cancer or active chemotherapy

- Uncontrolled diabetes
- Platelet dysfunction syndromes
- Chronic liver disease
- Severe anemia

Postpone Treatment If:

- On blood thinners or anticoagulants
- Active scalp wounds or sores
- Recent scalp procedures
- Active systemic infection

Not Ideal For:

- Complete baldness
- Advanced hair loss requiring transplant
- Scarring alopecia
- Patients seeking instant results

SECTION: Session Details

Total Duration: 60–75 minutes

- Consultation and assessment
- Blood draw
- PRP centrifugation

- Scalp preparation
 - Aquafirme PRP delivery
 - Post-treatment instructions
-

SECTION: Downtime and Recovery

- Minimal downtime
 - Return to work: Same day
 - Exercise: Resume after 24–48 hours
 - Hair washing: Resume after 24 hours
-

SECTION: Results Timeline

- Weeks 1–8: Internal follicle activation
 - Months 2–3: Reduced shedding, early thickening
 - Months 3–6: Visible density improvement
 - Months 6–12: Peak results
 - Maintenance sustains gains
-

SECTION: Expected Results

Common Outcomes

- Reduced shedding

- New hair growth in thinning areas
- Improved hair thickness
- Healthier scalp

Limitations

- Does not regrow hair in completely bald areas
 - Not instant
 - Not a replacement for transplant in advanced loss
 - Maintenance required
-

SECTION: Aftercare Guidelines

First 24 Hours

- No washing hair
- Avoid touching scalp
- No exercise, sweating, swimming, or sun exposure

Days 2–7

- Resume gentle hair care
 - Avoid chemical treatments
 - Protect scalp
-

SECTION: Pricing Structure and Value

- Single session: \$400
 - 3-session series: \$1,200
 - 6-session series: \$2,400
 - Maintenance: \$400–\$800 annually
-
