

Chemical Peels & PRX-T33 — Service Knowledge Document

What They Are

Chemical peels and PRX-T33 are advanced skin rejuvenation treatments that use specialized formulations to improve skin texture, tone, and appearance. While both deliver impressive results, they work differently and suit different needs.

VI Peel — A medical-grade chemical peel that exfoliates the top layers of skin to reveal fresher, healthier skin underneath.

PRX-T33 Collagen Stimulator — An innovative "no-peel peel" that stimulates collagen deep in the skin without visible peeling or downtime.

VI Peel — \$300

What It Is

The VI Peel is a medical-grade chemical peel formulation containing a synergistic blend of acids (TCA, salicylic acid, retinoic acid, phenol, vitamin C) that penetrates skin to treat acne, sun damage, melasma, fine lines, and uneven texture. It's suitable for all skin types and tones.

How it works:

- Acid solution is applied to clean skin
- Penetrates to controlled depth
- Triggers exfoliation and cell turnover
- Dead skin peels off over 3-7 days
- Reveals fresh, rejuvenated skin
- Stimulates collagen production

What it treats:

- Sun damage and age spots
- Melasma and hyperpigmentation
- Acne and acne scars
- Fine lines and wrinkles
- Uneven texture and tone
- Large pores

- Dull, aging skin

Key benefits:

- Safe for all skin types and tones
- Customizable for specific concerns
- Visible results after one treatment
- Treats multiple issues simultaneously
- Relatively short downtime
- Dramatic improvement

Recommended plan: Series of 3-6 peels spaced 4-6 weeks apart for optimal results

PRX-T33 Collagen Stimulator Series — \$1200

What It Is

PRX-T33 is a revolutionary bio-revitalization treatment that combines high-concentration TCA with hydrogen peroxide and kojic acid. Unlike traditional peels, it stimulates collagen production **WITHOUT** causing visible peeling, making it perfect for those who want results without downtime.

How it works:

- Medical-grade solution is massaged into skin
- Penetrates deeply to stimulate fibroblasts
- Triggers immediate collagen and elastin production
- Hydrogen peroxide allows deep penetration without frosting
- Skin tightens and rejuvenates from within
- No actual peeling occurs (though skin may shed microscopically)

What it treats:

- Fine lines and wrinkles
- Skin laxity and sagging
- Uneven texture
- Dull, tired-looking skin
- Loss of elasticity
- Stretch marks (on body)
- Acne scars
- Overall skin rejuvenation

Key benefits:

- No visible peeling or downtime

- Immediate skin tightening
- Safe for all skin tones
- Can be done year-round
- Cumulative collagen-building results
- Treats face, neck, décolleté, hands, body

Pricing: \$1200 for series (typically 4-6 treatments spaced 1-2 weeks apart)

What's the Difference?

Choose VI Peel if you want:

- Visible exfoliation and peeling
- Treatment for pigmentation or melasma
- Acne and acne scar improvement
- Don't mind 3-7 days of peeling downtime
- Dramatic results after one treatment

Choose PRX-T33 if you want:

- No visible peeling or downtime
- Collagen stimulation and tightening
- Glow and radiance without shedding skin
- Can't take time off for peeling
- Gradual, cumulative improvement

Many clients do both! VI Peel for specific concerns, PRX for ongoing collagen maintenance.

Who It's For

Ideal candidates for VI Peel:

- All skin types and tones (Fitzpatrick I-VI)
- Adults with sun damage, melasma, or pigmentation
- People with acne or acne scarring
- Those wanting dramatic exfoliation
- Clients willing to commit to peeling downtime
- Anyone seeking comprehensive skin rejuvenation

Ideal candidates for PRX-T33:

- Anyone wanting collagen stimulation without downtime
- People with fine lines and early aging
- Those with busy lifestyles

- Clients who can't take time off for peeling
- Anyone seeking gradual skin improvement
- People wanting to maintain results from other treatments

Both are perfect for:

- Anti-aging and prevention
- Skin texture improvement
- Overall skin health
- Pre-event preparation (with timing)

Who Should NOT Get Them

Avoid chemical peels if you have:

- Active skin infections or cold sores
- Open wounds or abrasions
- Recently used Accutane (wait 6 months)
- Severe eczema or psoriasis
- Allergy to peel ingredients
- Recent facial surgery

Avoid PRX-T33 if you have:

- Active skin infections
- Very sensitive skin with rosacea flare-up
- Allergy to treatment components
- Recent laser or peel treatments (wait 2 weeks)

Postpone both if you:

- Are pregnant or breastfeeding
- Have active cold sores (can trigger outbreak)
- Recently had facial waxing (wait 1 week)
- Have sunburned skin
- Recently had injectables (wait 2 weeks)

Typical Session Length

VI Peel: 30-45 minutes

- Consultation and prep: 10 minutes
- Application: 15-20 minutes
- Post-care instructions: 10 minutes

- Take-home post-peel towelettes provided

PRX-T33: 30-45 minutes per session

- Skin prep: 5-10 minutes
- Application and massage: 20-30 minutes
- Post-treatment care: 5 minutes
- Multiple sessions in series (4-6 total)

Typical Downtime

VI Peel Downtime:

Days 1-2:

- Skin looks slightly red/tan
- Mild tightness
- No visible peeling yet
- Makeup can cover redness

Days 3-5:

- Visible peeling begins
- Skin sheds in sheets (especially around mouth and eyes)
- Can look flaky and unsightly
- **This is when you need social downtime**

Days 6-7:

- Most peeling complete
- Revealing fresh, glowing skin
- Can return to normal activities
- Makeup application normal

Days 7-10:

- Peeling fully complete
- Dramatic improvement visible
- Skin looks refreshed and rejuvenated

PRX-T33 Downtime:

Immediately after:

- Slightly pink or flushed (lasts 1-2 hours)

- Skin feels tighter and smoother
- Visible glow

Days 1-7:

- No visible peeling (though microscopic shedding occurs)
- Progressively smoother texture
- Increasing radiance
- Can wear makeup immediately
- Return to all activities same day

ZERO social downtime!

What Results People Notice

VI Peel Results:

After one peel:

- Dramatic improvement in texture
- Brighter, more even skin tone
- Reduced pigmentation
- Smaller pores
- Fresher, rejuvenated appearance

After series of 3-6:

- Significant reduction in melasma or sun damage
- Improved acne and reduced scarring
- Smoother, more youthful skin
- Long-lasting improvement

PRX-T33 Results:

After first treatment:

- Immediate glow and radiance
- Tighter skin feel
- Smoother texture

After full series (4-6 treatments):

- Visible skin tightening
- Reduced fine lines
- Improved elasticity

- Radiant, healthy glow
- Cumulative collagen building

Both provide:

- Long-lasting improvement with maintenance
- Better product absorption
- Healthier skin overall

Aftercare Basics

VI Peel Aftercare:

First 48 hours:

- Don't wash face or get peel wet
- No sweating or exercise
- Sleep on clean pillowcase
- Don't touch or pick at skin

During peeling (days 3-7):

- Let skin peel naturally (DON'T pick!)
- Use provided post-peel products only
- Gentle cleansing when allowed
- No makeup until peeling complete (or light mineral makeup)
- Wear SPF 30+ religiously
- No sun exposure

After peeling complete:

- Continue sun protection
- Resume normal skincare gradually
- Avoid harsh products for 2 weeks
- Stay hydrated

PRX-T33 Aftercare:

First 24 hours:

- Don't wash face for 6-8 hours
- No sweating or exercise same day
- Can apply makeup after 6-8 hours

Ongoing:

- Wear SPF 30+ daily
- Use gentle skincare
- Stay hydrated
- Avoid harsh exfoliants between treatments

Much easier than traditional peels!

Pricing Structure

VI Peel: \$300 per treatment

- Single treatment provides visible results
- Series of 3-6 recommended for specific concerns
- Spaced 4-6 weeks apart

PRX-T33 Collagen Stimulator Series: \$1200

- Includes 4-6 treatments (typically 4-5)
- Spaced 1-2 weeks apart
- Best results come from complete series

Package pricing available for multiple VI Peels

Popular approach:

- Start with PRX series for collagen building
- Add seasonal VI Peels for specific concerns
- Combine for comprehensive skin health program

FAQs

Which peel should I choose? It depends on your goals and downtime tolerance:

- **VI Peel:** Want dramatic exfoliation, have pigmentation issues, can handle 3-7 days of visible peeling
- **PRX-T33:** Want collagen stimulation and glow, can't take time off, prefer gradual improvement

Will I definitely peel?

- **VI Peel:** Yes, visible peeling is expected days 3-7
- **PRX-T33:** No visible peeling (only microscopic exfoliation)

Can I do this before an event?

- **VI Peel:** Yes, but time it so peeling is complete 1-2 weeks before event
- **PRX-T33:** Yes! No downtime, so you can do it close to events

Does it hurt?

- **VI Peel:** Mild tingling or heat for 5-10 minutes during application. Well-tolerated.
- **PRX-T33:** Slight tingling during massage. Very tolerable.

How long do results last? Both: Several months to a year with proper skincare and sun protection. Maintenance treatments extend results.

Can I combine with other treatments? Yes, but timing matters. Wait 2 weeks after peels before doing injectables, RF, or lasers. Discuss with your provider.

What if I pick at my peeling skin? DON'T! This can cause scarring, infection, or pigmentation issues. Let it shed naturally.

Can I work out during peeling? With VI Peel: Avoid sweating during peeling phase (days 3-7). With PRX: Resume next day.

Is this safe for dark skin? Both are safe for all skin tones when performed properly. VI Peel was specifically designed to be safe for ethnic skin.

Next Steps

Ready to reveal your best skin?

1. **Book your FREE consultation:** Online at harmonyaestheticsandwellness.glossgenius.com or call/text (240) 280-0020
2. **During your consultation:**
 - We'll assess your skin concerns and goals
 - Recommend VI Peel vs. PRX vs. both
 - Create customized treatment plan
 - Discuss timing based on your schedule
 - Show before/after photos
3. **Choose your treatment:**
 - **VI Peel (\$300):** For exfoliation and specific concerns
 - **PRX-T33 Series (\$1200):** For no-downtime collagen building
4. **Plan accordingly:**
 - VI Peel: Schedule when you can take 5-7 days of social downtime
 - PRX: Can start anytime!
